Future of Urban Development. Development Initiative: Tianjin Champion City Strategy. Geneva Switzerland, © World Economic Forum, January, 2013, 21 p.

The Future of Urban Development initiative partners with cities to address key urban development challenges and risks, such as congestion, healthcare, governance, sustainability and moving to a service-based economy. A specific objective of the initiative is to facilitate the implementation of agreed solutions. In partnership with the National Development and Reform Commission's China Center for Urban Development, the first phase of the initiative focuses on China. At the Annual Meeting 2013, the Tianjin Blueprint, developed in collaboration with the city of Tianjin, People's Republic of China, was released.

Palabras Clave: China, Tianjin, ciudades, desarrollo urbano, congestión, salud, gobernanza, sostenibilidad, servicios, crecimiento económico

Clasificación JEL: O18, P25, Q01, R51, Y10
