Energy Vision 2013. Energy transitions: Past and Future. Geneva Switzerland, © World Economic Forum, January, 2013, 47 p.

This report seeks to provide a context and framework for understanding the energy mix, how a transition might unfold and what the challenges and questions are for the components of the energy. Although energy efficiency and other demand-side issues are critical to future energy systems, this report focuses on how society will meet its growing energy needs. .

Palabras Clave: energía, combustibles, madera, carbón, petróleo, gas, electricidad, crecimiento económico

Clasificación JEL: 42, Q43, Q48, Y10
