Special feature: Changes to the guidelines for attributing revenues to levels of government.

OECD, 24 Nov 2009, 340 p.

The OECD's annual Revenue Statistics publication provides a long series of historic data for the 30 member countries of the OECD. It provides data not just on aggregate tax burdens but on breakdowns between different taxes. By bringing all these cross-country data together, it provides analysts and commentators with a platform for understanding and interpreting more recent developments in tax receipts.
