## Global Information Technology Report 2005-2006. WEFORUM

The Report uses the Networked Readiness Index (NRI), covering a total of 115 economies in 2005-2006, to measure the degree of preparation of a nation or community to participate in and benefit from ICT developments.

The NRI is composed of three component indexes which assess:

- the environment for ICT offered by a given country or community
- the readiness of the community's key stakeholders - individuals, business and governments and the usage of ICT among these stakeholders.
