The World's Women 2005: Progress in Statistics, United Nations, Department of Economic and Social Affairs,
January 2006

The World's Women 2005 uniquely reviews and analyses the current availability of data and assesses progress made in the reporting of national statistics, as opposed to internationally prepared estimates, relevant to gender concerns. Analyzing statistics reported by 204 countries during the past 30 years, The World's Women 2005 sets out a blueprint for improving the availability of data in the areas of demographics, health, education, work, violence against women, poverty, decision-making and human rights.
